   Mantle Cell Lymphoma With Skin Invasion Characterized by the Common Variant in the Subcutis and Blastoid Transformation in the Overlying Dermis

2. Amagai M
   Autoimmune and infectious skin diseases that target desmogleins
   Proc Jpn Acad Ser, 86 (5): 524–537, 2010.05.

   Diverse targets of the transcription factor STAT3 contribute to T cell pathogenicity and homeostasis

   Flaky tail mouse denotes human atopic dermatitis in the steady state and by topical application with Dermatophagoides pteronyssinus extract

   Experimental evaluation of ebastine, a second–generation anti–histamine, as a supportive medication for alopecia areata

   Natural killer cells control a T–helper 1 response in patients with Behcet’s disease
   Arthritis Res Ther, 12 (3): R80, 2010.05.

7. Chan P T, Ohyama B, Nishifuji K, Yoshida K, Ishii K, Hashimoto T, Amagai M
   Immune response towards the amino–terminus of desmoglein 1 prevails across different activity stages in non endemic pemphigus foliaceus

8. Ishibashi M, Ohshima K, Chen K R
   Folliculotrophic mycosis fungoides with eosinophilia and CD30+ large–cell transformation: a case with a fatal outcome presenting with multifocal lesions and leonine facies
Discrete roles of STAT4 and STAT6 transcription factors in tuning epigenetic modifications and transcription during T helper cell differentiation

Simple PCR–based DNA microarray system to identify human pathogenic fungi in skin

11 Wakabayashi A, Tanese K, Yamamoto K, Tanomogi H, Miyakawa S
Extraocular sebaceous carcinoma expressing oestrogen receptor alpha and human epidermal growth factor receptor 2

12 Kobayashi T, Iwasaki T, Amagai M, Ohyama M
Canine follicle stem cell candidates reside in the bulge and share characteristic features with human bulge cells

Ahnak1 modulates L–type Ca(2+) channel inactivation of rodent cardiomyocytes

Removal of amino–terminal extracellular domains of desmoglein 1 by staphylococcal exfoliative toxin is sufficient to initiate epidermal blister formation

15 Tajima M, Mitsuhashi Y, Irisawa R, Amagai M, Hashimoto T, Tsuboi R
IgA pemphigus reacting exclusively to desmoglein 3

16 Marg A, Haase H, Neumann T, Kouno M, Morano I
AHNAK1 and AHNAK2 are costameric proteins: AHNAK1 affects transverse skeletal muscle fiber stiffness

17 Suzuki R, Shioda T, Konohana I, Ishizaki S, Sawada M, Tanaka M
Dermoscopic Features of Eccrine Porocarcinoma Arising from Hidroacanthoma Simplex

18 Terada T, Sugiura M
Metastatic hepatocellular carcinoma of skin diagnosed with hepatocyte paraffin 1 and α-fetoprotein immunostainings

Homologous regions of autoantibody heavy chain complementarity-determining region 3 (H–CDR3) in patients with pemphigus cause pathogenicity

20 Funakoshi T, Payne A S
Cleavage isn’t everything: potential novel mechanisms of exfoliative toxin-mediated blistering

21 Kouno M, Ko R, Shimizu A, Ouchi T, Sueoka K, Masunaga T, Ishiko A
A Japanese–specific recurrent mutation and a novel splice site mutation in the LAMC2 gene identified in two Japanese families with Herlitz junctional epidermolysis bullosa

Autoimmunity to desmocollin 3 in pemphigus vulgaris

A Japanese case of ichthyosis follicularis with atrichia and photophobia syndrome with an MBTPS2 mutation

Generation of human melanocytes from induced pluripotent stem cells

Enhanced murine contact hypersensitivity by depletion of endogenous regulatory T cells in the sensitization phase

Aire–dependent thymic expression of desmoglein 3, the autoantigen in pemphigus vulgaris, and its role in T–cell tolerance

27 Ishibashi M, Kudo S, Yamamoto K, Shimai N, Chen K R
Churg–Strauss syndrome with coexistence of eosinophilic vasculitis, granulomatous phlebitis and granulomatous dermatitis in bullous pemphigoid–like blisters

Desmosome disassembly in response to pemphigus vulgaris IgG occurs in distinct phases and can be reversed by expression of exogenous dsg3
